DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 10/29/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2, 7-18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The applicant attempts to exclude materials by using the language "substantially free" followed by generically listed chemical compounds "peroxides, amines, polyamide..." This is indefinite. The scope of the claim is not definite because there is an overlap in scope between the claimed "curable compound" and the compounds listed as being excluded. For example, melamine is listed as a compound to be excluded and as a compound to be used as a curable compound requisite claim 8. Furthermore, many chemical compounds contain groups which are included and excluded such as epoxy amine compounds.

Art Unit: 1713

5. It is not clear if all acids are excluded or if only those considered "curing agents" are excluded. This is indefinite because the acids are not identified and different acids would function as curing agents given different conditions.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2, 7-18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuki et al.

8. This patent describes compositions which can be heat cured. The curable compound is shown at column 3, lines 5+. The silane compound as requisite claim 17 is suggested at column 3, lines 33+. The metal acrylate is described at column 4 lines 31+. The preferred Zn diacrylate is rendered obvious by the generic listing and the Zn acrylates specifically identified in the examples. Boron nitride and titanates are suggested at column 5 lines 20+. The difference between the claimed invention and the prior art is that there is no example of each of the claimed ingredients used in combination with one another in the absence of the compounds to be excluded. The claims are obvious because each of the claimed ingredients are suggested to be used together and the compounds to be excluded are optional. Further, it is obvious to leave out ingredients and lose their known function. Given the indefiniteness of the claim and

Art Unit: 1713

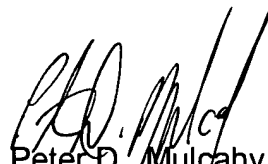

the known function of the functional ingredients one would be motivated to formulate compositions falling within the scope of the claimed invention.
